**FQ SPECIFICATIONS: CRUSHING OF BUILDERS RUBBLE AT THE DEVON VALLEY WASTE DISPOSAL FACILITY**

**BACKGROUND**

Cell no. 3(three) at the DVLS has a lifespan of 3(three) months left. This was confirmed by a recent survey conducted during the month of July 2018. The total airspace left was measured to be 65000 cu meters. Builder’s rubble and soil constitutes 50% of the total volume received monthly at the DVLS.

Members of the general public, building contractors and the Municipality are being encouraged to separate their builder’s rubble and clean soil from the domestic waste stream. The clean builder’s rubble and clean soil may then be off-loaded at a designated area of the DVLS, Devon Valley Road in Stellenbosch.

The material is currently being stockpiled and the municipality requires bidders to beneficiate the rubble and soil to usable deposits of sand and G3-5 bits.

The successful Contractor must provide for the supply of all labour, plant, tools, equipment and management necessary to provide mechanical crushing of builder’s rubble at the DVLS. The Contractor will be responsible for the co-ordination of all vehicles, crushing equipment and liaison with the Landfill site staff. This must be done in a manner that will ensure that all operations are carried out in a safe, orderly and efficient manner.

**PLANT:**

All plant used on the Site must be appropriate for crushing, screening and sorting the particular material on the site, must be of sufficient capacity, in good working condition, and be so designed and constructed as to cause minimum dust, noise and air pollution.

The crusher shall be able to crush at least 350m<sup>3</sup> of builder’s rubble per day. The Contractor must also supply the necessary mechanical plant for the top-loading of the crusher machine.

All plant shall be operated by properly qualified and experienced operators. In the event of a breakdown occurring, the Contractor shall be capable of calling upon such back-up or replacement plant within 48 hours as is necessary to ensure that the operation is not placed in jeopardy.

Although there is 24 hour security at the Devon Valley Landfill Site, the service provider is responsible for ensuring the safety of its plant and equipment – especially during night time. The costs involved in securing this equipment must be included in the bid price.

**Operation**

The available historical weighbridge tonnages of rubble are as follows:

The average weight of builder’s rubble and soil entering the landfill between July 2017 and June 2018 was **4222 tons and 5,609 tons per month respectively** (see **Table 1** below).

**Table 1: Clean builders rubble and soil of between July 2017 and June 2018 (in tons)**

	July 2017	Aug 2017	Sep 2017	Oct 2017	Nov 2017	Dec 2017	Jan 2018	Feb 2018	Mar 2018	Apr 2018	May 2018	June 2018	AVG/ month	TOTAL

*Crushing frequency:*

*The source of the builder's rubble includes that of private residents, building contractors and Stellenbosch Municipality. Builder's rubble is stockpiled by the Municipality and the Contractor will be contacted to mobilise the plant once the stockpile reaches a certain volume.*

*It is not expected that the Contractor will be permanently on site - only when required by the Municipality. Once the original agreed tonnage has been crushed and the immediate need satisfied, the supplier may retire the equipment until sufficient space has been cleared to resume operations.*

*The Municipality will give at least two weeks' notice prior to the required mobilisation.*

*It is expected of the successful service provider to do the following:*

*Process the stockpile that already exists at the DVLS comprising of builder's rubble and soil to a G7 and G8 specification.*

*Monitor all incoming waste loads to determine whether it is suited for beneficiation or whether it should be landfilled.*

*Separate and sort incoming mixed loads.*

*Crush builder's rubble to G3 and G5 Sub base and sort soil to G7 Filling Sand.*

*The respective dumping fee currently R524 per ton (incl VAT) for the 2018/2019 financial year and increasing yearly on 01 July) will be charged to the appointed service provider for all tailings landfilled. This excludes tailings emanating from waste already being stockpiled on site before the contractor is appointed.*

**Site Staff**

The contractor shall provide sufficient staff on the site to ensure proper management, material handling, traffic regulation and good people relationships.

The contractor must provide one sufficiently trained and qualified staff member on site on a permanent basis to screen all incoming builder's rubble and soil, ensuring that only uncontaminated material that can be beneficiated is accepted free of charge.

Staff must be uniformed as per OHS standards and their clothing must reflect the name of the contractor. **The successful contractor must submit his health and safety plan prior to the commencement of the contract.**

Staff must be competent and trained in their role – albeit as traffic controller or operator of equipment.

The contractor must ensure that security is maintained on the site and that all safety measures are in place at all times.

The contractor is responsible for the conduct and the quality of the work done by the employees.

Although there is 24 hour security at the Devon Valley Landfill Site, the service provider is responsible for ensuring the safety of its plant and equipment – especially during night-time. The costs involved in securing this equipment must be included in the bid price

**Control of spectators**

*Due to incessant noise of the crusher as well as a top loader the working area is regarded as extremely dangerous. The following is minimum requirements of the municipality – any further steps as regarded necessary is welcomed:*

*No curious passers-by (including salvagers) must be allowed within 50 meters of operations.*

*In event of official and approved visitors, hard hats and neon bibs must be provided to them.*

*Only visitors approved by the Manager: Solid Waste Management may be allowed.*

*The hooters and whistles on moving equipment must at all times be in working condition when operating.*

*The municipality will accept no responsibility for injuries or death to either passers-by or staff on the premises.*

*Before commencement of the service, it is the responsibility of the Contractor to provide proof of sufficient third party and other insurance to cover any eventuality, proof of which is to be submitted to Stellenbosch Municipality upon award.*

### **Control of nuisances**

*The Contractor shall take all reasonable measures to operate the Site so as to reduce and, where possible, prevent nuisances, such as:*

*Dust (by ensuring that unnecessary airborne material is not generated during operations).*

*Air pollution (by ensuring that plant is in optimal working condition).*

*Noise (by ensuring that all plant silencers, etc. are in good working order and by limiting the operations to the prescribed hours).*

### **Record keeping**

*The Contractor shall maintain detailed daily records of the following aspects and these shall be available for inspection by the Municipality at all times. A detailed report must also be sent to the Municipality on a monthly basis.*

*Starting and stopping times of machines and equipment*

*Time in operation*

*Quantities of crushed material handled*

*Complaints lodged*

*Accidents*

*Breakdowns and stoppages*

*Factors that impeded progress: General weather conditions (e.g. Temperature, rainfall, and wind direction) hampering operations*

*It is a requirement that the Contract's Manager and Site Supervisor schedule a monthly minute meeting (either on site or in the municipal offices) with the municipal representative.*

*All municipal infrastructure defaults and incidences of vandalism must be reported.*

*A report of weights of materials handled and removed from site must be submitted to the Solid Waste Management Department on a monthly basis to be received no later than the 4<sup>th</sup> of each month. The weight of all tailings disposed must also be recorded.*

*The contractor is to provide a monthly waste manifest to the Municipality indicating where crushed and screened material was transported to.*

*The supply of consumables for record keeping is the responsibility of the Contractor.*

**Stockpiles**

*The Contractor shall take all reasonable measures to keep his working areas and stockpiles, clean and orderly. The following shall apply:*

*All crushed stockpiles must be kept neat and in one area at all times.*

*Mechanical equipment must be available from time to time to shape stockpiles and clean up the site.*

*It is the responsibility of the successful service provider to dispose of all waste or tailings emanating from the crushing and screening activities on a regular basis. All tailings must be weighed at the DVLS weighbridge before disposal and accurate records of tailing disposed must be kept and reported to Stellenbosch Municipality on a monthly basis.*

**Loading of material**

The Contractor must provide machinery and operators for the loading of the builder's rubble crusher and to move the crushed stone matter around, cleaning up spillage and the heaping up of loose material into stockpiles as required at the crushing areas. This equipment and operator will be required on a part time basis only.

**End use crushed material**

The end-use of the crushed material may be as cover material on the Landfill or for the use in the construction of wet weather roads on the Landfill should the Municipality need to retain ownership. The crushed material might also be used by the Municipality's roads department or other roads. Transport of the crushed material from the stockpile to the landfill will be the Municipality's responsibility.

The remaining crushed and screened material that the Municipality has no use for will become the property of the service provider for further beneficiation.

**Crushing operation:**

During times of operation the Contractor shall direct all vehicles off-loading builder's rubble to an orderly stockpile area and redirect any members of the public to the correct area if they have mixed or contaminated builder's rubble.

Mechanically crush the accumulated rubble on site on a day-to-day (during time of operation) basis and keep stockpiles neat and tidy at all times.

Keep accurate record of the volume of crushed material.

Ensure that the operation continues in all weather conditions.

Reduce noise (by ensuring that all plant silencers, etc.) are in good working order and by limiting the operations to the prescribed hours.

Oversize material to be broken down by Contractor at his own expense.

Observe the Site rules for the landfill.

**Maintenance**

The Contractor shall ensure that all crusher(s), containers and vehicles are kept in a clean and good condition at all times.

**Site facilities available**
